

## Ideas for Learning Opportunities over the Summer Break:

- Visit a museum, historical site, or local areas on interest such as the aquarium, Atlanta History center, Tellus, or Fernbank.
- Complete an interactive simulation for science and math using <http://phet.colorado.edu/> from the University of Colorado Boulder. These free interactive math and science simulations engage students through an intuitive, game-like environment where you can learn through exploration and discovery.
- Read the news each day. It is a great way to stay up to date on world affairs, build vocabulary, increase your reading skills, and broaden your horizons.
- Read a classic novel.
- Visit a college campus and research scholarships.
- Prepare for the ACT, PSAT, or SAT using Khan Academy.
- Use Ga411 and Big Future to research colleges and careers.
- Volunteer, complete an internships, job shadow, or get a part time job in your area of interest.
- Participate in free cultural enrichment activities and opportunities.
- Participate in a summer program that matches your interests.
